

CM18 Solo+

Personal Cash Recycler

ARCA 

CM18 Solo+

Automate with ease.

The Product

The CM18 Solo+ adds a secure, locked teller cash drawer and pedestal base with rolled coin locker to a recycler for additional functionality. Designed for the largest bank in the United States, it's the perfect solution for banks of any size that want the benefits of cash recycling without the added expense of facilities construction.

Dual user TCRs are typically placed between two users and require removing existing teller dividers and renovating the teller counter. But the CM18 Solo+ can replace under counter steel without expensive physical modifications. It slides into the place of a teller drawer and coin locker for a quick cash recycler deployment.

Right Size, Right Fit

The CM18 Solo+ is the perfect solution when you need to retrofit cash automation into existing branch infrastructure. Its single user design and high capacity make it ideal for cash environments like busy merchant windows or commercial branches with high cash volumes. A single user TCR is often faster and more efficient than a dual user recycler which requires tellers to alternate transactions creating longer wait times for customers.

The additional cash and coin storage capacity enables the Solo+ to meet the storage requirements of satellite branches making it the only solution needed for these locations.

Features

- Capacity of \$85,000 to \$130,000+ depending on configuration
- Deposit/dispense in batches of up to 200 notes without limits per transaction
- Full image sensors for visible, UV & IR light plus magnetic and ultra sound sensors
- RS232, USB 2.0 and TCP/IP connectivity
- Lockable cash drawer and pedestal for loose cash and rolled coin storage
- Dimensions (h x w x d):
37.60 x 17.32 x 35.43 in
955 x 440 x 900 mm
- Weight: 941.37 lb / 427 kg
