

**CM18** Cash Recycler

Proven,  
reliable  
performance.

## THE PRODUCT

The graceful lines of the CM18 are indicative of the level of detail that our Italian designers placed in the engineering of this modern marvel. The CM18 automates cash processes, by accepting, authenticating and storing banknotes in a secure environment.

By removing the need to count and verify currency, employees can now dedicate their attention to the customer—using technology to provide a better overall experience.

## FEATURES

We engineered redundancies in the CM18. By doing this, we ensure that our technology stays running even in the most demanding environments.

It also has flexible configuration options. The CM18 offers a scalable capacity that can grow from 8 to 12 recycling modules at any time. This adaptability allows the machine to be modified depending upon your particular operational needs.

## SPECS

- Deposit/dispense transactions in batches of up to 200 notes
- Full image sensors for Visible, UV & IR light plus magnetic and ultra sound sensors
- RS232, USB 2.0 and TCP/IP connectivity

### CM18 Tall:

- 8, 10 or 12 cassettes (6,000 total notes)
- Dim.: 37.09" (h) x 17.32" (w) x 31.50" (d)
- Weight: 877.44 lbs

### CM18 Short:

- 8 cassettes (4,000 total notes)
- Dim.: 26.46" (h) x 17.32" (w) x 31.50" (d)
- Weight: 696.66 lbs
