

CM18b

Cash Recycler

CM18b

Cash recycling and cash deposit in one device.

The Product

The CM18b automates cash handling processes and doesn't require dual control staffing for cash shipments.

The CM18b is also a deposit solution that automatically bags cash. The tamper-evident bags are sealed securely inside the unit and ready for CIT pickup. No more cash strapping, giving staff even more time to serve customers. It allows staff to recycle the cash needed for daily cash transactions as well as commercial change orders. It also reduces the time staff spends manually preparing cash for shipments and eliminates the need for dual control.

Right Size, Right Fit

The CM18b offers the unique feature of a dedicated bagging system. In one section of the machine, notes are neatly stacked in a sealed bag, physically separated from the recycling modules, giving you unlimited capability.

Never strap or face bills again, just remove the bag and deposit. The CM18b makes manual cash management a thing of the past.

The CM18b eliminates labor intensive, cash related tasks from management's responsibilities. By automating traditional manual cash handling processes you will realize lower labor costs while freeing employees to focus on what matters most – the customer.

Features

- Recycling capacity of \$85,000+ depending on configuration
- Deposit/dispense in batches of up to 200 notes without limits per transaction
- Full image sensors for visible, UV & IR light plus magnetic and ultra sound sensors
- RS232, USB 2.0 and TCP/IP connectivity
- Up to 6 recycling cassettes
- Mechanically sealing bag with a capacity of 3,000 banknotes
- Dimensions (h x w x d): 40.70 x 17.32 x 32.76 in
1,034 x 440 x 832 mm
- Weight: 992.08 lb / 450 kg
